

## Chapter 3 Basic Procedures of INTERGLAD Ver. 7

System Installation and Initial Setting .....	1
A. Start-up .....	10

### [Installation]

Q1 INTERGLAD isn't starting

Please follow the manual, [Chapter 3 System installation and initial setting](#).

Setting procedure

[Internet Edition](#) [Page 2, 3]

[Standard Edition](#) [Page 3-5]

[CD full function Edition](#) [Page 5-7]

Please note the following when installing and initial setting.

· Application type of INTERGLAD,

[Internet edition, Standard edition, CD full function edition](#) [Page 1]

※ The setting procedure is different, depending on the application type.  
Also, the necessity of Internet connection, Available functions.

· Is the OS (operating system) of the PC, 64 Bit version, or 32 Bit version.

※ It relates to batch file rewriting.

· Java installation on PC is necessary.

Is Java Ver.7 or Ver.8 be installed ? (Java Ver7 is recommended)

※ Depending on the version of Java, available function is restricted,

Refer to [Application type of INTERGLAD](#) [Page 1]

※ It relates to batch file rewriting.

# System Installation and Initial Setting

Required procedures are different with INTERGLAD types (Internet edition, Standard edition, CD full function edition). In addition, available functions are different with Java version used. Refer the following list.

## Application Types of INTERGLAD Ver. 7

1. Internet edition Without system install, full functions except file operation and User Data are available with the latest data.

System Install	Internet Connection	Authentication	Java (32bit)	Available Database <sup>1</sup>	Available Function						PC		
					Search	Analysis	Prediction /Design	Print <sup>2</sup>	File Import /Export <sup>3</sup>	User Data Conversion /Registration	OS	Rewrite of Batch File	
												Win 32bit	Win 64bit
Required	Required	Server (ID, PW)	Ver. 7	Server DB	Yes	Yes	Yes	Yes	No	-	Windows Linux Mac OS X	-	-
			Ver. 8										

2. Standard edition Full functions are available with the latest data (for Java Ver. 7).  
Full functions except User Data are available with the latest data (for Java Ver. 8).

System Install	Internet Connection	Authentication	Java (32bit)	Available Database <sup>1</sup>	Available Function						PC		
					Search	Analysis	Prediction /Design	Print <sup>2</sup>	File Import /Export <sup>3</sup>	User Data Conversion /Registration	OS	Rewrite of Batch File	
												Win 32bit	Win 64bit
Required	Required	Server (ID, PW)	Ver. 7	Server DB	Yes	Yes	Yes	Yes	Yes	-	Windows Linux* Mac OS X* (* only for Server DB)	Required <sup>5</sup>	Required <sup>6</sup>
				Local DB	Yes	Yes	Yes	Yes	Yes	-			
				User DB	Yes	Yes	Yes	Yes	Yes	Yes			
			Ver. 8	Server DB	Yes	Yes	Yes	Yes	Yes	-	Windows Linux Mac OS X	Not Required	Not Required
				Local DB	No	No	No	No	No	-			
				User DB	No	No	No	No	No	No			
Temporary System <sup>4</sup> Decompress				Server DB	Yes	Yes	Yes	Yes	Yes	-	Windows Linux Mac OS X	Not Required	Not Required
				Local DB	Yes	Yes	Yes	Yes	Yes	-			
				User DB	Yes	Yes	Yes	Yes	Yes	No			

3. CD Full Function edition Without internet connection, full functions are available (for Java Ver. 7).  
Without internet connection, full functions except User Data are available (for Java Ver. 8).

System Install	Internet Connection	Authentication	Java (32bit)	Available Database <sup>1</sup>	Available Function						PC		
					Search	Analysis	Prediction /Design	Print <sup>2</sup>	File Import /Export <sup>3</sup>	User Data Conversion /Registration	OS	Rewrite of Batch File	
												Win 32bit	Win 64bit
Required	Not Required	Access Key	Ver. 7	Local DB	Yes	Yes	Yes	Yes	Yes	-	Windows	Required <sup>5</sup>	Required <sup>6</sup>
				User DB	Yes	Yes	Yes	Yes	Yes	Yes			
			Ver. 8	Local DB	No	No	No	No	No	-		-	-
				User DB	No	No	No	No	No	No			
Temporary System <sup>4</sup> Decompress				Local DB	Yes	Yes	Yes	Yes	Yes	-	Windows Linux Mac OS X	Not Required	Not Required
				User DB	Yes	Yes	Yes	Yes	Yes	No			

### 1 Available Database

Server DB: Database stored in the INTERGLAD server of the NGF, available with the latest data any time.

Local DB: Database installed on the user's PC from the Web page or CD by the NGF, renewed every year.

User DB: Database in which the user registered his/her own data on the user's PC, available for use such as search along with the Server DB or Local DB.

2 Print: Prints of tables and figures as searched results, etc. are available.

3 File Import/Export: Data- and image-save/open are available for search conditions, search results, analysis results, prediction results, etc.

4 Temporary System: INTERGLAD system using JDBC and UcanAccess for Java Ver. 8, which has been made temporarily, because Java Ver.8 does not have the access function to ODBC date source.

5 Rewrite of the batch file for Win 32bit PC: java → "c:\Program Files\Java\jre7\bin\java.exe" (Not Required only with Java Ver. 7)

6 Rewrite of the batch file for Win 64bit PC: java → "c:\Program Files (x86)\Java\jre7\bin\java.exe" (Required even only with Java Ver. 7)

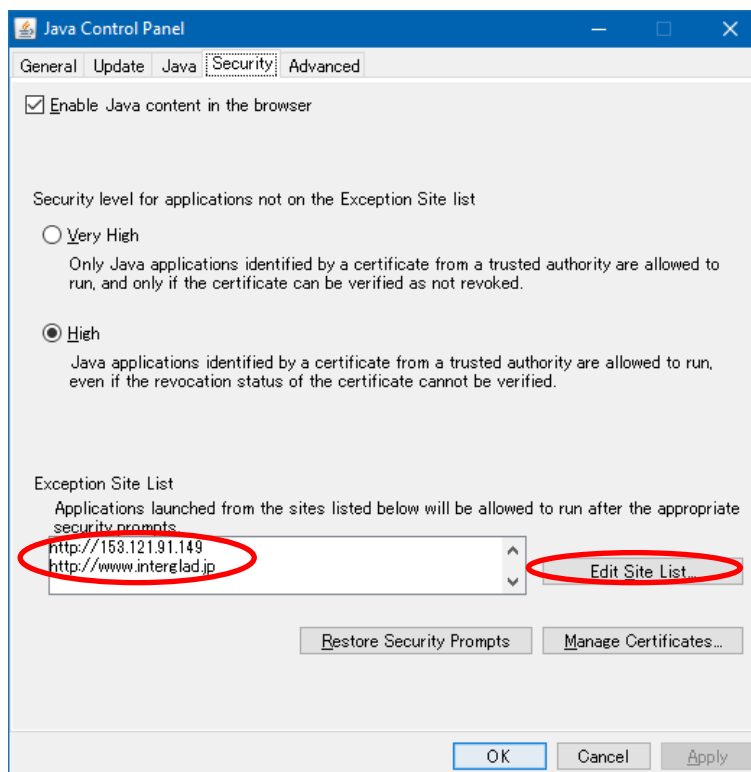

INTERGLAD system is composed of Property Database and Structure Database. The Structure Database does not have functions of prediction/design and user data, and it is only english version.

1. Procedure for Internet Edition
  2. Procedure for Standard Edition
  3. Procedure for CD Full Function Edition
  4. Procedures of Update for Standard and CD Full Function Edition
  5. Procedure for Change of Connection IP Address for New Server
- The procedures are explained for Windows 10 as an example.

## 1. Procedure for Internet Edition

Internet edition can be used only by installing of Java (Version 6 or newer). Refer to 2. 2). For Windows 10, etc. the following procedure is required. Open the Control Panel and select Java. On the [Security] window of Java Control Panel, check “Enable Java content in the browser,” and add “http://153.121.91.149” and “http://www.interglad.jp” in the Exception Site List by clicking the [Edit Site List] button. For Internet Edition, URL http://153.121.91.149/interglad7 or http://www.interglad.jp/interglad7/ can be used, and the addition in the Exception Site List corresponding to the URL is necessary. Microsoft Edge and Google Chrome are unable to use, because they do not work for Java. Refer to 4. 2) c. of Chapter 2. for the details of the Web browser.

Java Control Panel  
[Security] window

For start-up of Internet Edition, open the [INTERGLAD WEB] page by setting,

<http://153.121.91.149/interglad7/> or <http://www.interglad.jp/interglad7/>. This page can be opened also from NEW GLASS FORUM Web site by clicking [Ver. 7 Internet edition] of [Access to INTERGLAD] in the right-hand side menu followed by opening the [INTERGLAD 7] page. Input the User ID and Password in each box at the left side of the window, and click the [LOGIN] button. When some dialogues appear, proceed as follows.

- 1) Java was blocked because it is out of date and needs to be updated. →Run this time
- 2) To display the webpage again, the web browser needs to resend the information you've previously submitted. →Retry
- 3) Your java version is out of date. →Later
- 4) Do you want to run this application? →Run

The [Main] window of INTERGLAD appears under the window of INTERGLAD WEB. Start INTERGLAD by setting the [Main] window upside.

## **2. Procedure for Standard Edition**

- 1) Check Operating System 32 bit or 64 bit

The user can distinguish if the OS of his/her PC is 32-bit or 64-bit in the [System] window from [System and Security] of [Control Panel].

- 2) Install Java

Download and install Java on the user's PC from the following Web page.

[http://www.java.com/en/download/ie\\_manual.jsp](http://www.java.com/en/download/ie_manual.jsp)

By this procedure usually the newest Java Version 8 of 32-bit is installed. Java Version 7 or former has access function to ODBC data source, but Java Ver. 8 does not have it. Therefore when only Ver. 8 is installed, the user cannot use the Local Database and User Database. For use of full functions of INTERGLAD, install Java Ver. 7 (32-bit) from the following Web page, since the public update by Oracle Corp. has already finished (4.2015).

<http://www.oracle.com/technetwork/java/javase/downloads/java-archive-downloads-javase7-521261.html#jre-7u80-oth-JPR>

Windows x86 Offline: jre-7u80-windows-i586.exe

For this, create a free Oracle Account, and the user can download and install it by inputting the Username and Password.

When Java Ver. 7 is already in the PC, take care not to uninstall it. The user can utilize acquisition support by Oracle for necessity of security. All functions except the functions of User Data are available by installing only Ver. 8.

- 3) Install INTERGLAD system

- ① Open the following INTERGLAD Web page, and click the [LOGIN] button after inputting your User ID and Password. Then the [Downloads] page opens.

<http://www.interglad.jp/interglad7/download/>

This Web page can be opened also from NEW GLASS FORUM Web site by clicking [Ver. 7 Standard edition system download] of [Access to INTERGLAD] in the right-hand side menu followed by opening the [INTERGLAD 7] page.

- ② Choose the Windows Installer “interglad-7.\*.\*-setup-win.exe” for Windows 10 (the same for 7, 8, Vista) and install it on the user’s PC. Occasionally the user needs to stop or lower the security level of the PC for installing. For instance, when Windows SmartScreen is active on Windows 10, he/she has to cancel the protection once. In some environments, inputting ID and Password of the PC manager are necessary.

For Mac OS X/ Linux, download and decompress “interglad-7.\*.\*.zip.”

- 4) Rewrite the batch file [interglad7] for use of Java Ver. 7

This rewrite is necessary for use of Java Ver. 7 and 8 together on 32-bit PC, and for use of Java Ver. 7 and 8 together, or only Java Ver. 7 on 64-bit PC. It is not necessary for only Java Ver. 8.

- ① By right-clicking the [INTERGLAD7.6] icon on the desktop, select [Edit] of the [interglad7] file.
- ② Rewrite the batch file and save it. The code letters should be ANSI.

Before rewrite:

```
java -Xms64m -Xmx512m -classpath interglad.jar interglad.search.Main
```

(Window below)

For 32-bit PC rewrite as follows.

```
"c:\Program Files\Java\jre7\bin\java.exe" -Xms64m -Xmx512m -classpath  
interglad.jar interglad.search.Main
```

For 64-bit PC rewrite as follows.

```
"c:\Program Files (x86)\Java\jre7\bin\java.exe" -Xms64m -Xmx512m -classpath  
interglad.jar interglad.search.Main
```

Copy and paste of rewrite letters above is convenient.

- 5) Start-up of INTERGLAD

Double-click the [INTERGLAD 7.6] icon on the desktop of the PC, and the [Main] window of INTERGLAD opens. Input the User ID and Password of INTERGLAD and click the [OK] button, and the user can perform search and all other functions. Inputting the User ID and Password is necessary in each starting of the system. Open the [Preference] window from the [Preference] icon on the top menu bar of the [Main] window, and select the [Server] radio button of the [INTERGLAD Data]. In the use of Java Ver. 8, [Cannot connect local database....] dialog appears 4 times at start-up, then click the [OK] button in each dialog. In the use of Java Ver. 7, such a dialog does not appear.

6) Provisional version applicable for Java Ver. 8

The provisional version applies JDBC and UCanAccess software complementally for access function to ODBC database. In this version the full functions except registration and conversion of User Data are available. Preregistered User Data are available for search and prediction with Server Data.

To apply this version, first open the [Downloads] page by procedure of 3) ③, and click [User Environment of INTERGLAD]. Download and decompress [INTERGLAD 7.\*b] “interglad-7.\*.\*b.zip” in 2 (2) of the opened page. INTERGLAD starts up by double-clicking the [interglad7] on the desktop, shortcut icon of “interglad7.bat” in the [INTERGLAD 7.5b] folder. For the first start-up it takes time, around 10 minutes.

### 3. Procedure for CD Full Function Edition

1) Check Operating System 32 bit or 64 bit

The user can distinguish if the OS of his/her PC is 32-bit or 64-bit in the [System] window from [System and Security] of [Control Panel].

2) Install Java

Install Java Ver. 7 (32-bit) from the following Web page.

<http://www.oracle.com/technetwork/java/javase/downloads/java-archive-downloads-javase7-521261.html#jre-7u80-oth-JPR>

Windows x86 Offline: jre-7u80-windows-i586.exe

For this, create a free Oracle Account, and the user can download and install it by inputting the Username and Password.

Java Version 7 or former had access function to ODBC data source, but Java Ver. 8 does not have it. Therefore when only Ver. 8 is installed, the user cannot use this

common CD Full Function Edition which needs the Local Database. When the user have to use only Java Ver. 8, refer to 3. 6). Take care not to uninstall Java Ver. 7 at Java update. The user can utilize acquisition support by Oracle for necessity of security.

### 3) Install INTERGLAD system

Choose the Windows Installer “interglad-7.\*.\*-sa-setup-win.exe” for Windows 10 (the same for 7, 8, Vista) in the CD from the NGF and install it in the user’s PC. Occasionally the user needs to stop or lower the security level of the PC for installing. For instance, when Windows SmartScreen is active in Windows 10, he/she has to cancel the protection temporarily. In some environments, inputting ID and Password of the PC manager are necessary.

### 4) Rewrite the batch file [interglad7]

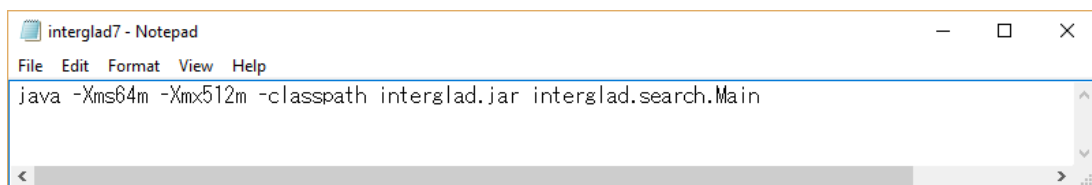

This rewrite is necessary for use of Java Ver. 7 and 8 together on 32-bit PC, and for use of Java Ver. 7 and 8 together, or only Java Ver. 7 on 64-bit PC.

① By right-clicking the [INTERGLAD7.\* SA] icon on the desktop, select [Edit] of the [interglad7] file.

② Rewrite the batch file and save. The code letters should be ANSI.

Before rewrite:

```
java -Xms64m -Xmx512m -classpath interglad.jar interglad.search.Main  
(Window below)
```

For 32-bit PC rewrite as follows.

```
"c:\Program Files\Java\jre7\bin\java.exe" -Xms64m -Xmx512m -classpath  
interglad.jar interglad.search.Main
```

For 64-bit PC rewrite as follows.

```
"c:\Program Files (x86)\Java\jre7\bin\java.exe" -Xms64m -Xmx512m -classpath  
interglad.jar interglad.search.Main
```

### 5) Start-up of INTERGLAD

Double-click the [INTERGLAD 7.\* SA] icon on the desktop of the PC, and the [Main] window of INTERGLAD opens with [INTERGLAD Ver. 7: Setup] dialog box

(below). Input the license key in the dialog box, and click the [OK] button. The user can perform search and all other functions.

6) Provisional version applicable for Java Ver. 8

The provisional version applies JDBC and UCanAccess software complementally for access function to ODBC database. In this version the full functions except registration and conversion of User Data are available. Preregistered User Data are available for search and prediction. To use this version, download and decompress “interglad-7.\*.\*b-sa.zip” in the CD which has been sent by NGF on the user’s PC. By double-clicking the [interglad7] batch file, INTERGLAD starts up. For the first start-up it takes time, around 10 minutes.

#### 4. Procedures of Update for Standard and CD Full Function Edition

For the Standard Edition, click [Check Update] of the [Help] pulldown menu on the menu bar of the [Main] window, and the [INTERGLAD Downloads] webpage opens. When a new version appears on the page, update to the new version of Ver. 7 by the following procedure 2)~9),

When a dialog below appears, update the Standard Edition by the following procedure.

1) Open the [INTERGLAD Ver. 7] page in the website of NEW GLASS FORUM. Click [Ver. 7 Standard edition system download] of [Access to INTERGLAD] in the menu on the right side of the page. Input the User ID and Password and click the [LOGIN] button. Next click [Download].

2) Choose the Installer of the newest version fit to the OS of the PC on the [INTERGLAD Downloads] page, download and save it in the user’s PC.

For Windows 10 (Vista, 7 or 8), interglad-7.\*.\*-setup-win.exe

Provisional version applicable for Java Ver. 8 is also available. Refer to 2. 6).

3) When the PC has data registered in the User Database, save the user data file with

registered data, MDB File (Glass Property) “GP\_user\_7\*.mdb” before update. The user data file is in the following folder as default, and transfer it to the desktop, etc.

Windows 10 (Vista, 7 or 8), C:\INTERGLAD 7.0\GP\_user\_7\*.mdb

(Windows XP,

C:\Program Files\New Glass Forum\INTERGLAD 7.0\GP\_user\_7\*.mdb)

- 4) Uninstall the [INTERGLAD 7.\*] system in the [Programs and Features] window from the [Control Panel]. If the user tries to update without uninstallation of the system, an [Error] message appears on the way.
- 5) To use all functions including functions of User Data, Java Ver. 7 (32 bit) is necessary. When Java Ver. 7 is not in the PC, install it. All functions except the functions of User Data (conversion, registration and use for search) are available, when Java Ver. 8 (32 bit) is installed in the PC. Refer to 2. 2).
- 6) Install INTERGLAD by double-clicking the saved installer by 2) on the PC.
- 7) When Java Ver. 7 is used, open [interglad7 – Notepad] window by right-clicking the [INTERGLAD 7.\*] icon and then selecting [Edit], and rewrite the phrase. Refer to 2. 4).
- 8) Place the saved user data file by 2) in the new [INTERGLAD 7.0] folder. When the saved file is “GP\_user\_76.mdb,” the new file “GP\_user\_76.mdb is replaced to the saved file.,
- 9) When the user data file is “GP\_user\_7\*.mdb (\*: 5 or less), convert it to “GP\_user\_76.mdb”. Refer to 6.1 (2) (F) in Chapter 4.
- 10) Start-up INTERGLAD by double-clicking the [INTERGLAD 7.6] icon. Open the [Preference] dialog box, and select the newest MDB Files of Local Database and User database and click the [OK] button.

For the CD Full Function Edition, perform the above procedure of 2)-10). Here in 2), the installer of the new version is in the CD sent by NGF, and the Windows Installer is “interglad-7.\*.\*-sa-setup-win.exe.” In 3), 4) and 8), [INTERGLAD 7.0] is replaced to [INTERGLAD 7.0 SA]. In 7) and 10), the [INTERGLAD 7.6] icon is replaced to the [INTERGLAD 7.\* SA] icon.

## **5. Procedure for Change of Connection IP Address for New Server**

The INTERGLAD server has been replaced by new one in May 23, 2017. Therefore the user of the Standard Edition has to change the connection IP address by the following procedure. Without the change the user cannot use the Standard Edition.

- 1) After starting-up the Standard Edition, when a dialog “Cannot Connect INTERGLAD Server. Set up Network Configuration.” appears, click the [OK] button. And the [Preference] dialog box opens.
  - 2) Change the IP address from “61.194.5.20” to “153.121.91.149” or “www.interglad.jp” as shown in figures.
  - 3) Click the [OK] button.
- Only one time IP Address change is required.

[Preference] dialog box  
Before renewing

After renewing

OR

For the Internet Edition, add “http://153.121.91.149” or “http://www.interglad.jp” to the Exception Site List in the [Security] window of the Java Control Panel. Refer 1
